Attachments: Needed updates to CES application_CH.docx

Hi Shari,

I have a few questions and made a few edits (check if they are correct) in the attached. We can have a call if you have any questions.

Thanks,
Calvin

Subject: Cadmus evaluation of CES responses to RAI 5

Good morning, Calvin

Attached is our evaluation of CES's responses to RAI 5. The document is rather long, but if you search for the word "April," you will find our evaluations of the questions in RAI 5.

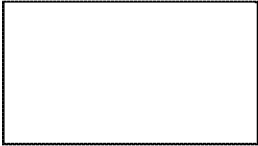

In general, we think CES has responded to all of EPA's questions and that issuing a draft permit to construct is appropriate. There are a couple of follow up questions that we think can be addressed in the updated permit application. There is also one question for you about seismic risk associated with the Emergency and Remedial Response Plan (p. 39).

We have extracted all of the requests from RAI 1 through 5 (including the follow-up questions as a result of this review) into the attached "Needed updates to CES application." That document is split into: (1) information that is needed in an updated permit application before construction can be authorized and (2) information that will be needed prior to authorizing injection.

If you agree with the larger evaluation document, then everything needed for a letter from David to CES should be in the "Needed updates" document.

Please let me know if you have any questions.
